Professional Profile

_____

As a student with a strong passion for technology in the world of IT and for web development, I`m looking for a company or a team where I can apply my knowledge and skills and gain experience. I`m eager to learn from experts in the field and contribute to the company`s mission. (Nurzhan 19 y.o)

Technical Skills

_____

Programming languages: JavaScript(basics), HTML, CSS
Technologies/Frameworks: React.js(basics), Bootstrap, SASS, Git (basics)
Developer tools: Visual Studio Code, WebStorm, GitLab, GitHub
Product management: Agile

Personal Projects

_____

ToDo List

Outline:

We have assembled a team of 5 people to create a ToDo List. This is done in order to feel like a real programmer who can work in a team. In this team was 5 members, one PM, two backend developers, two frontend developers. **Unfortunately, we haven't finished this project.**

Used technologies: JS, HTML, CSS, Axios(basics), React(React-Form, React-Route), Git

Developer tools: WebStorm, GitLab

Product management: Agile

Key responsibilities:

- I have created a login and registration pages, Build client-side validation in login and registration pages.
- I was responsible for UI/UX.

Hackathon Halyk Life Insurance

Outline:

My team and I have been working on developing a prototype web service for Halyk Life.

We have created a web service through which the user can get advice using a telegram bot with built-in artificial intelligence. We have created an interactive training for users so that they can learn more about the Insurance product. Unfortunately, we did not take the prizes, as our front fell during the performance((But we consider it a victory that we reached the end. ([click to see](#))

Used technologies: JS, HTML, CSS, Git

Developer tools: VS code ,GitLab

My role in team: Front-end

Key responsibilities:

- I have been working on creating a SPA for clients.
- I was responsible for the design. (I created my first website layout)
- We deployed the front using ngrok.
